PROFILE

Game producer with experience leading a 20-person multidisciplinary team through development and release in a capstone project. My background combines production planning with hands on work in Unreal Engine and Unity, helping me communicate clearly with technical and creative teams.

GAME PRODUCTION EXPERIENCE

Neon Steel | BloodFeather Studios

July 2025 - Present

Executive Producer & UI/UX Developer | Capstone Project | Simulated Studio Production

- Led production for a 20-person team across programming, design, UI/UX, animation, rigging, art, audio, narrative, and marketing through June 19, 2026, itch.io release and post-launch support.
- Managed scope, milestones, priorities, task assignments, dependencies, blockers, reviews, and cross-discipline communication; designed separate automated Trello workflows for development and art.
- Guided the team to complete every feature in the approved scope two weeks before launch, then organized four closed playtests of 10-15 participants and coordinated launch critical bug triage and assignments.
- Built the main and pause menus, HUD, graphics, display and audio settings, information panels, and credits in Unreal Engine 5 using Blueprints.

Strikeforge | Independent Development under 2CENT

June 2026 - Present

Project Lead & Programmer | Three Person Team | Alpha

- Lead production and programming for a three-person Unity project, owning MVP scope, milestones, task planning, contributor coordination, documentation, GitHub workflows, playtesting, and builds.
- Implemented input tracking and core forging progression in C#, supported by an Asset Validator, Build Maker, Forge Item Creator, Item Registry, Game Configuration system, and Developer Hub.
- Secured access to Toronto Film School's motion-capture studio, then planned and directed 29 animations organized across 10 FBX files.

The Rolling Stone | Independent Project

January - April 2026

Sole Developer | Released with Occasional Post Release Updates

- Designed and released a Unity HTML5 endless runner with keyboard, controller, and touch support; implemented progression, cosmetics, cloud leaderboards, privacy controls, and anti-cheat.
- Reached 2,000+ browser plays within one month and a 4.7/5 rating across 19 itch.io ratings, then supported the release through fixes and content updates.

Additional releases: Rogue Malfunction - Programmer and Game Designer, four-person TFS Game Jam team, 800+ browser plays; Eclipsed - sole developer, 300+ browser plays.

LEADERSHIP EXPERIENCE

Student Works Painting | Toronto, Ontario

April - November 2024

Crew Chief | Full-Time Contract

- Managed a five-person team of three painters and two marketers, scheduling daily assignments, supplying equipment, and coordinating door-to-door marketing around active project locations.
- Helped the team generate \$90,000 in revenue while maintaining a 93% on-time completion rate, with no customer complaints or safety incidents.

EDUCATION

Toronto Film School | Toronto, Ontario

January 2025 - June 2026

Advanced Diploma, Video Game Design & Development | GPA: 4.21/4.3 | President's List and Honour's List, all six terms

George Brown Polytechnic | Toronto, Ontario

2020 - 2024

Advanced Diploma, Business Administration - Project Management | GPA: 3.34/4.0
